- Actual BW – 75 lb., Adj. WW – 705 lb. (ET), 8/1 wt. 1235, SC 37 cm
- Semen Available: \$40/unit •\$50/Certificate

Roseda Farm

When we received the genomic data and updated EPDs on D118's first calf, we felt like we had won the genetic lottery. Thus, the name **Roseda Powerball23 F091**.

Roseda was founded in 1996, 23 years ago. For 23 years we have been breeding Angus cattle that work for all segments of the beef industry. Easy calving, fast growing, high marbling cattle with acceptable maternal traits. While we have made significant genetic progress, **Powerball23** is one of those **RARE** individuals whose key EPDs exceed those of his parents. There is not an animal in the Angus Breed that can match his combination of CED, YW and Marb EPDs.

Powerball23 will be moved to North American Breeders in early August and a preliminary semen evaluation indicates that we should have frozen semen available by the time you read this ad.

Please contact or visit Roseda Farm to place your order.
